

Here is our minimal example:

Table 1: **Table Whatever** This table is just produced with somerandom data and does not mean anything. Just to show you how things work.

Model	α	β	t-value	R^2
1	2.02	0.97	0.03	0.50
2	2.06	-0.07	0.05	0.00
3	2.06	-0.05	0.04	0.00

From table 1 you can't learn a lot, what matters is how it looks...
